1. Extension Installation Guide

- Go to My downloadable products. The file that you download normally is a zip file.
- Use FTP client (such as Filezilla, WinSCP, cuteFtp) to upload or copy all folders in the zip package to your Magento site root folder. This will not overwrite any existing files, just add new files to the folder structure.
- Open Command line in folder root of Magento and run following command respectively:
 - php bin/magento setup:upgrade
 - php bin/magento setup:static-content:deploy
 - php bin/magento indexer:reindex
 - php bin/magento cache:flush
- Navigate to Stores/Configuration, if you can see the extension tab, it is installed properly.
- If you need professional help regarding [Magento Extension Installation](#), Feel free to contact us any time.

2. Configuration

Once you have successfully installed the extension, go to **Size Chart** → **Configuration** to configure the extension for use. Here you can find various settings for the extension.

Enable: Option to enable or disable Size Chart extension.

Restrict Size Chart for Specific Customer Group: Select customer groups to restrict display of size chart for them.

Set Size Chart: Here you get WYSIWYG editor to set size chart for products to show on frontend. You can set image, CMS block, table or any HTML code to display size chart.

The screenshot displays the configuration interface for the Size Chart extension. On the left, a sidebar menu shows 'Size Chart' selected. The main content area is titled 'Configuration' and contains three sections:

- Enable:** A dropdown menu is set to 'Yes'. A callout box points to this dropdown with the text 'Enable or disable extension from here'.
- Restrict Size Chart for Specific Customer Groups:** A dropdown menu is open, showing options: 'NOT LOGGED IN' (selected), 'General', 'Wholesale', and 'Retailer'. A callout box points to this dropdown with the text 'Select customer group to restrict size chart display'.
- Set Size Chart:** A 'Show / Hide Editor' button is visible above a WYSIWYG editor. The editor has a toolbar with various text and image editing tools. Below the toolbar is a large black text area. A callout box points to the editor with the text 'Set size chart globally for all products from here'.

At the bottom left of the editor, the path is shown as 'Path: p » img'.

Show Size Chart in: Select option to show size chart either in product content or in a responsive popup in frontend.

Show Size Chart on Click of: Set clickable element on frontend for customers to open size chart in popup.

Button Text: If you have selected “**Button**” in “**Show Size Chart on Click of**”, you can set button text to show on frontend.

Icon: If you have selected “**Icon**” or “**Icon + Text**” in “**Show Size Chart on Click of**”, you need to set icon image here.

Icon Text: Set icon text to show along with icon image if you have set “**Icon + Text**” in “**Show Size Chart on Click of**”.

Form configuration for Size Chart:

- Show Size Chart in:** Dropdown menu set to "Popup". *Standard size : 500 X 500*. Callout: "Select to show size chart in frontend".
- Show Size Chart on click of:** Dropdown menu set to "Icon + Text". Callout: "Set click option to show size chart in popup".
- Button Text:** Empty text input field. Callout: "Enter button text if selected above".
- Icon:** Includes a "Browse..." button, "No file selected.", and a "Delete Image" checkbox. Allowed file types: jpg, jpeg, gif, png. Callout: "Set icon image for clicking to show size chart".
- Icon Text:** Text input field containing "Size Guide". Callout: "Enter icon text".

3. Category specific Size Chart

Once you set global size chart, you can set it for whole categories as well. This is useful when you want all the products of a category needs to be displayed with a single size chart, yet not the one you have set globally. To set category specific size chart, go to **Product** → **Categories** and select the category for which you want to set size chart. Now go to “**Size Chart**” tab where you can find WYSIWYG editor to set size chart.

The screenshot displays the 'Women' category configuration page in the MageComp admin interface. The page title is 'Women' and the breadcrumb is 'Category Specific Size Chart'. The 'Store View' is set to 'All Store Views'. The 'Size Chart' tab is selected, and the WYSIWYG editor is active. The editor contains the following HTML code:

```
<td>
118
</td>
</tr>
</tbody>
</table>
```

Callouts in the image indicate: 'Select category for which you want to set category specific size chart' pointing to the 'Women (0)' category in the tree, and 'Set size chart here' pointing to the WYSIWYG editor.

4. Product specific Size Chart

Extension facilitates you to set size chart for specific products as well. This is useful when you want some of the products to show particular different chart than set in global or category. To set product specific size chart, go to **Product** → **Catalog** and select the product for which you want to set size chart. Now go to “**Size Chart**” tab where you can find WYSIWYG editor to set size chart.

5. Size Chart on frontend

Once you are all set with global, category specific and product specific size chart, you can see them on frontend. The size chart will prioritize from product to category to global means if you have set product specific chart, it will show rather than category chart set.

6. Deactivation of Extension in Case of Emergency

- Go to app → etc → config.php and find 'Magecomp_Sizechart' => 1, and replace 1 with 0.
- If something goes wrong, please contact us at <https://www.magecomp.com/helpdesk> or send us an email at helpdesk@magecomp.com

7. FAQs

- How size chart will be prioritized if set for all 3 – global, category and product?**

If you have set global, category specific and product specific size chart, it will prioritize to first show product chart, if not available than will display category chart and else if will show global size chart.

- How to show Size Chart through CMS block?**

Once you have created a CMS block with size chart details. Go to set size chart WYSIWYG editor and click on insert widget, select default template and CMS block from the list. Save the settings and you are done. Your CMS block content can be seen as size chart in frontend.

- **How to show size chart button on product view page in Porto theme?**
 - First of all go to `app\design\frontend\Smartwave\porto\Magento_Catalog\layout` and open `catalog_product_view.xml` file.
 - Now find for `<move element="page.main.title" destination="product.info.main" before="-"/>` in the file and paste below code after this.
 - ```
<referenceContainer name="product.info.main">
<block class="Magecomp\Sizechart\Block\Sizechart"
name="sizechart"
template="Magecomp_Sizechart::sizechart.phtml"
after="-">
</block>
</referenceContainer>
```

Thank You!
